

# The Carbon Chronicle

New Volume 1, Number 28

CARBON, ALBERTA, THURSDAY, APRIL 10, 1947

Authorized as second class mail, Post Office Department, Ottawa.

## POOR RADIO RECEPTION

There is something drastically wrong with radio reception in Carbon these days. An electrically operated set emits some of the weirdest growling and squealing at the turn of the switch and since we aren't radio technicians we cannot determine whether the trouble is atmospheric or caused by power line trouble or appliances.

The nuisance should not, however, be allowed to continue. Radio license from this town must amount to almost five hundred dollars annually and for that sum we should expect reasonable reception.

If the trouble is atmospheric we cannot justifiably expect the CBC to do anything about it, but if its source is elsewhere we should demand that it be remedied.

## OUR HALF ACRE

By H. J. Umbrite

The Forest and Prairie  
Fire Prevention Act

Farmers are reminded that they are required by law to secure a permit before starting a stubble fire. A guard of 20 feet must surround the area to be burned and three adult persons must guard the fire until burning is complete.

The field supervisor and all councillors are fire wardens and permits to burn can be secured from them.

Farmers are advised to thin twice before burning stubble. The damage wrought is far more serious than the benefit, if any, that is derived from burning. Burning over a field destroys humus, releases nitrogen from the soil and destroys living organisms that build up the fertility of the soil. One ton of straw contains 30 pounds of nitrogen, phosphorus and potassium, which burning destroys, thus lowering the supply of essential plant foods. When the stubble is destroyed by fire instead of being worked into the soil, the water holding capacity of the soil is lowered. Burnt over fields are more susceptible to serious erosion than those which have the trash incorporated into the surface of the soil. Phosphorus, nitrogen and potassium can be returned to the soil by the use of commercial fertilizers, however, fibre, humus and the soil itself cannot be returned by artificial means.

Contrary to common belief, fire does not destroy weed seed. The fire passes over the ground too rapidly to heat the seeds enough to destroy germination.

## OFF THE RECORD

It is reported in Ottawa that many strong objections are being made here against Canadian landlords continually raising the roof because rental controls have been maintained. We are inclined to think that there would be even more objections if the landlords raised the rent!

## CARBON NEWS

There will be a school bazaar and dance in Webb school on Wed., April 30. Johnny Craddock's orchestra. Gents 50c. Ladies please bring lunch.

Tom White started construction of his house this week.

Mr. and Mrs. Alf Hoivik will leave on Monday for a vacation in Norway.

Misses Elaine and Marion Torrance were home for the Easter week-end.

Mr. and Mrs. A. Diebrick of Calgary were Carbon visitors last week. Miss Verna returned to Calgary with them to spend the Easter holiday.

Mrs. Norman Nash and son Fredrick Norman, returned to Carbon on Wednesday.

Mr. John Kaiser received word last week of the death of his mother in Calgary.

Mr. and Mrs. C. H. Nash were weekend visitors to Stettler.

Mr. and Mrs. H. Trumbley of Calgary were visitors at the home of Mr. and Mrs. C. Trumbley over the week-end.

Mr. and Mrs. M. Switzer celebrated their wedding anniversary in Calgary during the Easter holiday.

Mr. E. Lambert is spending the holidays at Trochu. Mr. John Tood is at Oyen.

Mr. and Mrs. Rudy Martin are Calgary visitors this week.

Merle Anderson purchased a new Maple Leaf truck recently and expects to take delivery this week.

Mrs. C. Trumbley is in Calgary for a few days.

The Misses C. and M. Ritchie of Calgary spent Easter in Carbon.

Mr. and Mrs. J. Adams spent Sunday and Monday at Morrin.

Mr. and Mrs. Frank Emery were guests of Mr. and Mrs. M. Skerry of Didsbury over the week-end.

Freddie Mills, British heavy-weight pugilist, trains with a tiger cub.

People who listen at keyholes should be punished by what they hear, lock-jaw.

By-law No. 24

VILLAGE OF CARBON

## NOTICE

By order of the Council every occupant or owner of dwellings or business places within the Village shall on or before May 15th next, remove all garbage and debris from the premises to the satisfaction of the Sanitary Inspector.

## CARBON LIONS CHARTER NIGHT

The newly organized Carbon Lions Club will hold their charter night in the Scout Hall on Wednesday, April 16th. Mr. Ray Nelson of Chateau, Mont., District Governor of District 37A will present the charter. Guest speaker of the evening will be Mr. E. C. Collier, President of the Calgary Lions Club.

Charter night chairman is Lion Al Wallace. Chairmen of the various committees are: Program, Lion Art Weigum; reception, Lion Maurice Switzer; tickets, Lion Jim Hunt; special guest, Lion Art Weigum; photographer, Lion Bill Ohlhauser; religious, Lion President Frank Emery; charter, Lion Jack Adams; menu, Lion President; guest book, Lion Gilbert Harach; public address system, Lion Cliff Ohlhauser; decoration, Lions Bill and Ed Ohlhauser; table programs, Lion Del Tetz; tables and chairs, Lion Ernest Fox; room reservations, Lion Jack Adams.

Lions will be here on Charter Night from Red Deer, Innisfail, Didsbury, Three Hills, Trochu, Calgary, Irricana, Beiseker, Strathmore and Rockyford.

Rosebud Orchestra will be in attendance. Admission to the public is by invitation only.

Holland expects to produce 20,000,000 oysters this year.

## THIS WAY TO BANKRUPTCY

A. L. Smith, M.P., Calgary West, put a practical poser to the Government, but has received no answer. Said Mr. Smith:

"We are selling wheat under the market price, as well as beef, cheese, dairy products, and I could go down through the list. We are buying things in the world market. We have 600 or \$700 million against us on balance with the United States during the last year. What I am anxious to know is this:

"How can we continue to sell everything we have, even gold, under the world price, and buy everything we buy at the world price without going bankrupt?"

## SMALL SPUDS

When buying seed potatoes, make sure that they are seed, warns the supervisor of pest control for the Alberta department of agriculture. He says in every field of potatoes there are some small ones, simply because a family of potatoes does not all grow up at once, any more than a human family does. In a field grown from certified or Foundation A seed there are usually very few small potatoes because there is little or no disease in the crop.

Succeeding generations are gradually affected by "degen-

erating" diseases resulting in many small potatoes, small because they have been stunted by disease. Diseased potatoes, if planted, will produce little else than small tubers. The moral is this: beware of planting small potatoes unless they carry the special tag of the Dominion Seed Certification Service.

Small potatoes are not seed potatoes unless they carry a special label supplied by the Dominion department of agriculture showing that they are of seed quality. For your own protection, watch for the tag.

## HOLD FLAX SEED

With the urgent need for increased flax acreage in 1947, an effort is being made by the Canadian Wheat Board to allow growers to obtain their seed requirements before flax is shipped elsewhere.

A request has gone forward to all grain companies asking that carlot shipment of Board flax seed from country elevators be avoided unless permission for such shipment from the Board's Winnipeg or Calgary office has first been obtained.

There is a keen demand for flax seed and this request from the Wheat Board will assist materially towards Alberta's flax production program.

## TRY A CLASSIFIED

These People Know

What  
**SAVING**  
Means...

**451,726 NEW DEPOSITORS**

**CHOOSE THE B of M.**

Nearly half a million Canadians began saving at the Bank of Montreal during the war years. Today, the B of M family of depositors has well over a million and a half members.

Many of our customers know this: what they can spare today they may need tomorrow. So—bit by bit—their nest-eggs grow.

These are the people who have been fighting the battle of inflation—doing a good turn for their

country and a good turn for themselves.

These people know what saving means—they know that growing dollars mean growing confidence—that a "backlog" in their bank account is the first step to achieving personal independence and to getting those things they want most.

Why not follow the lead of more than a million Canadians and begin saving now at the B of M?

## BANK OF MONTREAL

Carbon Branch: D. E. RUSLER, Manager.

WORKING WITH CANADIANS IN EVERY WALK OF LIFE SINCE 1817

**URGENT WARNING  
TO POULTRYMEN****Caecal Coccidiosis**

This scourge of our growing birds, chickens and turkeys, has become so wide spread and distinctive that we can safely say

that it is now the greatest single cause of mortality in our young birds and that it is the greatest single cause of economic loss to our poultrymen. This disease may strike and develop slowly or it may strike between the third and twelfth

weeks of age but may cause heavy adult mortality as well.

C. W. Traves, poultry commissioner, advises that coccidiosis is caused by a small one-celled animal which must spend part of its life cycle in the intestines and ceca of the bird.

There it multiplies with great rapidity and causes intense irritation in the walls of the intestines and ceca. This irritation causes haemorrhages that result in blood in the droppings. Usually there is a great deal of blood in the droppings a day

or two after the first signs.

Strict sanitation must be practiced at all times. Dropping should be observed closely twice daily. All sick birds should be killed and the intestines and ceca opened their entire length.

Caecal Coccidiosis will cause heavy mortality in many of our Alberta chick and poul flocks this year. Be prepared to make certain that your flock is not one of those suffering unnecessary losses.

**HOW IT BEGAN**

In the early days of printing much of the work was done by monks. As a result the printer's terminology is still full of church words. The composing room is still the "chapel" and has "aisles". A case of type is called a "font" because holy water fonts were used as type receptacles. The small truck into which used type is dumped is still the "hel box" and the apprentice is a "devil". In addition there are hundreds of words like stet, dele, quad, folio, octavo, etc., which the printer monks took from the Latin they were so accustomed to using.

**PRINT IT**

It is not possible to repeat a news story from person to person, over a range of ten miles and keep it accurate. A story to be accurately repeated, must be printed.

Line Elevators Farm Service  
By  
D. M. McLEAN  
Assistant Director  
Winnipeg, Manitoba.

**Machine Shop Symphony**

Although restrictions on the purchase of new farm equipment have been lifted, production cannot keep pace with demand. Some farmers may be able to purchase used equipment but, in the main, conservation of present equipment is the best solution of a serious problem.

**Conservation and Protection.** Conservation in simple terms means care—the care that any good investment should have. Now that farm equipment must serve longer than ever before, care becomes doubly important.

Protection from the weather is of vital importance. Rust proofing compounds are available, and for a few cents any machine can be protected from the elements.

**Servicing and Repairing.** At this season of the year, with seed-time approaching, the very best plan is to thoroughly overhaul, and repair, all power, tillage, and seeding equipment. Machines overhauled now will operate more efficiently and more effectively during the spring rush. Although repair parts will not be as difficult to obtain as during the war years, some items will still be in short supply. Costly delays may be avoided by servicing and repairing farm equipment *now* along the lines suggested below.

(1) *Clean* off each implement to remove dirt and rust.

(2) *Check* each machine carefully for loose bolts, cracked or bent frames, and flat members.

(3) *Tighten* all gears, bearings, chain drives, and other moving parts for wear and breakages.

(4) *Order* replacement parts and repairs early. Install as soon as available.

(5) *Paint* exposed wood and metal parts with a good grade of implement paint.

(6) *Clean* all tillage surfaces to remove rust and apply rust proofing compound.

(7) *Grease* and oil all moving parts with a good grade of lubricant. This is no time to put off, until tomorrow, what can be done today. The best, the safest, and surest precaution is to do it now. The efficient use of machines to achieve maximum production of foods for the world's hungry peoples is, more than ever, a pressing need.

# IMPORTANT GOVERNMENT NOTICE

## Respecting Price Control

The following is a convenient summary of Board Order No. 711—published for the guidance and protection of Canadian consumers. It does not give the full legal text. For full details of the law reference should be made to the Order.

CLIP THIS AND KEEP FOR EASY REFERENCE

**Summary of****GOODS AND SERVICES REMAINING SUBJECT TO MAXIMUM PRICE REGULATIONS**

As set forth in Wartime Prices & Trade Board Order No. 711—effective April 2, 1947

**FOODS**

- All flours, flour mixes and meals.
- Yeast.
- Bread, bread rolls, and bakery products.
- Biscuits, except those completely covered with chocolate.
- Processed cereals, cooked or uncooked, including breakfast cereals, macaroni, vermicelli, spaghetti, noodles and other alimentary paste products.
- Rice, excepting wild rice.
- Pot and pearl barley.
- Shelled corn, but not including popping corn.
- Dried peas, soya beans, dried beans except lima beans and red kidney beans.
- Starch.
- Sugar, sugar cane syrup, corn syrups, grape sugar, glucose.
- Edible molasses.
- Honey.
- Tea, coffee, coffee concentrates.
- Malt, malt extract, malt syrup.
- Black pepper and white pepper, and substitutes containing black or white pepper.
- Butter.
- Casein.
- Cheddar cheese, processed cheese and cream cheese.
- Concentrated milk products of all kinds.
- Ice cream.
- Salad and cooking oils.
- Salt.
- Fresh apples — 1946 crop.
- Raisins, currants, prunes, dried dates, dehydrated apples.
- Tomatoes, tomato sauce, tomato paste, tomato pulp, tomato purée, tomato catsup, chili sauce, when in hermetically sealed cans or glass.
- Canned pork and beans, canned spaghetti and canned soups.
- Canned corn, canned peas, canned beans excluding the lima and red kidney varieties.
- Canned apricots, canned peaches, canned pears, canned cherries, canned plums.
- Fruits and vegetables in the two preceding items when frozen and sold in consumer size packages.
- Jams, jellies, marmalades.
- Meat and meat products, not including game, pet foods, and certain varieties of cooked and canned meats.
- Sausage casings, animal and artificial.
- Live, dressed and canned poultry (but not including turkeys, geese or ducks, live, dressed or processed; poultry spreads, poultry stews and poultry in pastry or pie crust).
- Canned salmon, canned sea trout, canned pilchards of the 1946 or earlier packs.
- Edible animal and vegetable fats including lards and shortenings.

**CLOTHING**

- Men's, youths' and boys' coats, jackets and wind-

breakers made wholly or chiefly of leather.

- Men's, youths' and boys' suits or pants made wholly or chiefly of cotton or rayon.
- Men's, youths' and boys' furnishings as follows:—blouses; collars; pyjamas; nightshirts; underwear, other than that made wholly of wool; dressing gowns, other than those made wholly of all-wool fabric; shirts, including sport shirts other than those made wholly of all-wool or all-rayon fabric.
- Women's, misses', girls', children's and infants' garments of all kinds (but not including—(a) garments made wholly of all-wool fabric, (b) raincoats, or (c) jackets and windbreakers, except when made wholly or chiefly of leather).
- Women's, misses', girls' and children's accessories as follows:—dickies, bibs, halters, neckwear, collars, cuffs and aprons.
- Knitted wear for either sex as follows:—undergarments, other than those made wholly of wool; circular knit hosiery of cotton or rayon.
- Work clothing, including aprons for either sex, when made wholly or chiefly of cotton or leather.
- Uniforms for either sex.
- Gloves, gauntlets and mitts for either sex when made wholly or chiefly of cotton or leather, except those designed as specialized sports equipment or for specialized industrial uses.
- Brassieres; foundation garments, but not including surgical corsets.
- Diapers and diaper supports.

**HOUSEHOLD AND OTHER TEXTILES**

- Textile products as follows, when made wholly or chiefly of cotton or rayon: bath mats, bedspreads, blankets except horseblankets, curtains, dish cloths, dish towels, drapes, face cloths, luncheon sets, napkins, pillow cases, sheets, silence cloths, table cloths, throw-overs, toilet seat covers, towels, wash cloths, window blinds, window shades.
- Floor rugs and mats chiefly of cotton.

**DOMESTIC FUELS**

- Coal, coke and briquettes: until April 16th, 1947.

**HOUSEHOLD EQUIPMENT AND SUPPLIES**

- Furnaces, fire-place heaters and other heating equipment except portable electric heaters.
- Jacket heaters and other water heating equipment.
- Soap and soap compounds.

**MOTOR VEHICLE ACCESSORIES**

- Pneumatic tires and tubes when sold for the purpose of or as original equipment on agricultural machinery.

**CONSTRUCTION PRODUCTS**

- Lumber of all kinds.
- Millwork such as doors, sashes, windows, stairs and gates.
- Plywood and veneers.
- Pre-cut lumber products designed for use in residential or farm buildings, but not including fully pre-fabricated buildings.
- Gypsum board and gypsum lath.
- Wallboards and building boards.
- Cast iron soil pipe and fittings.
- Nails.

**AGRICULTURAL MACHINERY, IMPLEMENTS, EQUIPMENT AND SUPPLIES**

- Practically all items of farm machinery, including planting, seeding and fertilizing equipment, plows, tillage implements and cultivators, haying machinery, harvesting machinery, tractors, wagons, dairy machines and equipment, sprayers and dusters.
- Articles of barn and barnyard equipment.
- Incubators, brooders, poultry feeding and watering equipment.
- Stationary gas engines.
- Harness and harness hardware.
- Barbed wire and other fencing wire and fences.
- Binder twine.
- Wheelbarrows.
- Feeds and feed products of all kinds except horse meat, pet foods, straw, clam shell and poultry grit.
- Fertilizers of all kinds, but not including humus, muck, manure, sphagnum moss or peat moss.
- Gopher poisons.
- Seed beans and seed peas.
- Grains as follows:—wheat; barley; oats; flaxseed; buck wheat; rapeseed; sunflower seed; grain screenings.

**RAW AND PROCESSED MATERIALS**

- Basic iron and steel products and alloys, including pig iron, cast iron, scrap, ingots, bars, plate, rods and wire.
- Primary, secondary and fabricated mill forms of the following non-ferrous metals and their alloys: copper, lead, tin and zinc.
- All fats and oils, including Vitamin A oils, of animal, vegetable or marine origin but not including refined medicinal cod liver oil.
- Glue stock, glues and adhesives of animal origin.
- Starches.
- Fibres, raw or processed, as follows: cotton, hemp, jute, sisal, all synthetic fibres and filaments excepting glass.
- Yarns and threads of, or containing any of the fibres listed above.
- Fabrics, over 12 inches in width whether knitted or woven of, or containing any of the yarns and threads referred to above.

- Sewing, embroidery and crochet yarns, threads and floss of any of the yarns and threads referred to above.
- Bobbinet, dress and curtain nets and netting.
- Elastic yarns, fabrics and webbing.
- Hides and skins from animals of a type ordinarily processed for use as a leather.
- Leathers and synthetic leathers of all kinds.
- Sheepskin shearings, tanned, but not further processed than combed or sheared and coloured on the flesh side.

**PULP AND PAPER**

- Wastepaper.
- Wood pulp, except (a) dissolving grades, (b) "alpha" grades of bleached sulphate, (c) "Duracel", (d) groundwood and unbleached sulphite grades sold for the manufacture of newsprint or hanging paper.
- Newsprint paper except when sold by manufacturers thereof.
- Paper board used in the manufacture of solid fibre or corrugated shipping cases.
- Boxboard grades of paperboard, except for wrapping newsprint paper or making newsprint cores.

**CONTAINERS AND PACKAGING MATERIALS**

- Containers, packaging and wrapping devices of a type used for the sale or shipment of products, when made from a textile fabric and including bags, cases, envelopes, folders and sacks.

**SERVICES**

- Transportation of goods and services associated therewith.
- Warehousing; dry storage of general merchandise and household goods other than wearing apparel; cold storage, including rental of lockers and ancillary services such as processing charges in cold storage plants.
- Supplying of meals or refreshments for consumption on the seller's premises, the supplying of beverages (except alcoholic beverages) by purveyors of meals or refreshments; the supplying of meals with sleeping accommodation for a combined charge, but not including the supplying of meals, refreshments or sleeping accommodation by an employer to his employees, directly or through a servant or agent.
- The packing or packaging or any other manufacturing process in respect of any goods subject to maximum prices, when performed on a custom or commission basis.

**USED GOODS**

- Used bags and used bagging and baling material.

Any material shown above processed for incorporation into, or any fabricated component part of any of the above goods is subject to maximum prices. Also any set which contains an article referred to above is subject to maximum prices even though the remainder of the set consists of articles not referred to.

**WEED CONTROL TESTS**

Discoveries made during the 1946 growing season indicated the urgent necessity for further experimental work to gain all possible knowledge of chemical weed control before embarking on the 1947 program. To await the coming of warm weather in Western Canada to conduct these experiments would cause a year's delay before the practical application could be adapted to Western Canadian conditions. To avoid this loss of time National Grain Company Ltd. dispatched chemicals and spray rigs to the Sacramento Valley in California and conducted a series of tests in February.

These tests involved the use of several chemicals and the method of application with particular reference to the most desirable strength of the solution applied, and the most effective means of applying with due regard to Western Canadian conditions. As a result of these experiments it is hoped that it will be possible to put into practice early in 1947 methods found most desirable in these early experiments. While final tests cannot be made for another month, early results indicate that equipment now in use can be adapted to the new and improved methods with only a modest expense.

As soon as final results are available they will be made known to all producers in order that the most efficient methods of weed eradication can be adopted in the 1947 program. Predictions with respect to the final results would be unwise at this time, but it seems fairly certain that extremely satisfactory weed control can be obtained using a much smaller volume of water than has been recommended to date.

**WORLD OF WHEAT**

Rates of Seeding

The Dominion Experimental Farms, particularly the Experimental Station at Scott, Sask., has for 16 years conducted a most important experiment on the rates of seeding of wheat, oats and barley, on both summerfallow and stubble.

Scott recommends sowing for wheat on summerfallow 1 1-4 bushels per acre if fertilizer is used, and 1 1-2 if no fertilizer is used. On stubble not more than one bushel per acre. For oats, on summerfallow, 1 1-2 to

2 bushels to the acre with fertilizer and 2 1-2 bushels if no fertilizer is used. On stubble not more than 2 bushels to the acre. For barley, on summerfallow, 1 to 1 1-2 bushels to the acre with fertilizer, or 2 to 3 bushels to the acre if no fertilizer is used. On stubble, for barley, not more than 1 1-2 bushels to the acre.

The lower rates, it is recommended, should be used when the moisture supply is low and on light soils; heavier rates when moisture reserves are abundant, or on heavier type soils, or when wireworms are present, or where there is a heavy weed infestation.

Heavier seeding rates of these grains tend somewhat to hasten maturity, particularly when used with commercial fertilizer and so help the crops to escape the early frosts.

These experiments are another instance of the valuable work being done for farmers by our Dominion Experimental Farms.

## PRICES BOARD BRIEFS

Limitations on the butter fat content as well as on the number of grades sold to consumers were removed April 1st. A further order limiting cream sales in certain designated areas was revoked at the same time. This does not affect any regulations covering the sale of fluid cream which may have been issued by any provincial authority. Board regulations governing the holding and distribution of cheddar cheese were removed April 1 also.

Because of greatly increased costs of raw sugar to Canada it has been found necessary to raise the ceiling price of refined sugar by one cent per pound on all sized packages and at all trade levels, effective April 1. This action follows the general pattern of decontrol, and has the same effect as partial removal of subsidy or partial elimination of a trading loss, where the subsidy or trading loss is transferred into a price increase. The cent per pound increase will cover most of the increase in raw sugar prices which has occurred during the past year or two. The balance of the loss will be made up out of the Sugar Stabilization Fund which was established early in the war and used since that time to hold Canadian sugar prices steady.

War-time restrictions governing the sale and manufacture of bread, such as limitations of loaf size and the return of unsold bakery products to manufacturers were removed on March 28th. Restrictions remaining are:

1. Bakers are still limited to a single sheet of buff colored paper for wrapping their bread.
2. The ready sliced loaf that requires extra wrapping is still prohibited.

The restrictions are continued because there will not be a sufficient supply of wrappers for some time to come.
